

H.V. Report

'Peer Pressure'

Peer Pressure is one of the ongoing issues faced by the world in general. Every state to increase its production of goods and services tries to increase the competition in the market. But due to this we see an increase stress, instabalibey and sadness in the people of the state.

This negative effect of peer pressure has ~~inc~~ largely effected the teenage teens of India. Many teens when trying to persue higher education have to take tougher examination (by tougher I mean the chances/probability of getting a sabisfactory rank for the particular exam). These teens had a very fun school days, where due to the ^{many} drop ^{policies} in the number of fail, no child left behind, every one wins. These not only increase the value of the schools but also reduces the education and makes the students over confident. And hence when they move to the real world they are hit with this high competition (especially in India) that

leads to peer pressure.

I am planning to do a survey on my fellow batch mates to understand how they were effected by peer pressure and ask what can be done to solve this or help the students faculty or college what can be done about the negative effects of peer pressure. Peer pressure effects different people irrespective of age, sex, etc.

Work in

- i) Phase I → Actions of individual which influence peer groups.
- ii) Phase - II → Analyse and understand the types of peer pressure and classify it as good or bad.

Thank You
